

2006: A Year of Transformation

Transformation: *the intentional process to create awareness, nurture attitudes, and provide tools to support an individual's and congregation's journey to be passionately faithful disciples of Jesus Christ. It is a spiritual, systemic, strategic, and on-going journey to fully live into God's calling.*

During 2006, the Region of Northern California-Nevada will be offering two exceptional opportunities for individuals and congregations to understand and move into an intentional pursuit of Transformation.

The first event will be the **Regional Summit on Transformation**, to be held **February 24-25**, at Santa Nella, California. During this event, clergy and lay people will be led in discussions to learn and share visions of how we can respond to God's desire to transform our churches and our lives so that we are passionately faithful to our calling as followers of Jesus Christ...in today's world.

The second event will be the **Annual Meeting at Asilomar**, to be held **April 28-30**. From the brochure on the Annual Meeting: "We will focus our attention on God's call to newness, on God's transforming power at work. Whatever our age or state of being as individuals, congregations and region, God is reforming and transforming us to be more vital, alive, spirit-filled and faithful disciples of Jesus Christ equipped to share the Good News! Isn't that grand!"

With stirring worship, great music, wonderful fellowship and inspiring preachers and teachers, we will lift our hopes and prayers to God to pour out a large measure of the life-changing, transforming, good news Spirit in each of us and our congregations!
